## Secure Schedule II Management Tools for healthcare providers

Today's medical practices and clinics have to balance treating patients high-grade pain needs with the ever-looming health care crisis of opioid addiction. The Henry Schein Medical Supply Chain Technology Team offers web-based tools to support secure procurement, compliant storage, and eco-friendly disposal of Schedule II pharmaceuticals—which can improve operational efficiency and help avoid risky regulatory scrutiny brought on by this dilemma. We call this offering our Secure Pharma Supply Chain.

## The statistics for opioid addiction are alarming:

More than  
**2 Million Americans**  
have become dependent  
on or abused prescription  
pills and street drugs

Approximately  
**80%**  
of people who use  
heroin first misused  
prescription opioids

Roughly  
**21-29%**  
of patients prescribed opioids  
for chronic pain misuse them

On average  
**115 Deaths**  
occur from opioid  
overdoses each day

Source- U.S. National Institute on Drug Abuse (NIDA)

## Prescribing Opioids for Chronic Pain Guide

Opioids can provide short-term benefits for moderate to severe pain. Scientific evidence is lacking for the benefits to treat chronic pain. For more information on prescribing opioids download this [pocket guide](#) from the CDC

## Compliant purchasing, storage, and disposal of controlled II narcotics for your patients with severe pain

Henry Schein provides resources and solutions for healthcare providers to safely and effectively manage their patients with chronic pain. Henry Schein Medical offers three critical Secure Pharma Supply Chain Pillars: CSOS-Compliant Electronic Purchasing of Schedule II Drugs, Secure Medication Management, Eco-friendly Reverse Pharma

Electronic Purchasing Class II Drugs		
Medication Management		
Reverse Pharma
